# Preface

Welcome to the proceedings of ICCHP-AAATE 2022! We are delighted to present to you the proceedings of the Joint International Conference on Digital Inclusion, Assistive Technology, and Accessibility, a conference jointly organized by the International Conference on Computers Helping People with Special Needs (ICCHP) and the Association for the Advancement of Assistive Technology in Europe (AAATE).

Rapid technological deployments are showing the way to a world with no barriers and more flexibility, with personalized and adaptable technologies that will allow full participation of people with disabilities of all ages. We are in a position to hold high-level discussions on the topics of eHealth and eCare, eLearning and eInclusion, eDemocracy and eGovernment, eServices and social innovation, ambient and assisted active living, accessible traveling and tourism, user centered design for all, and many others.

Within this framework, and after the COVID-19 pandemic forced us to cancel AAATE 2021 and move ICCHP 2020 online, we decided to join efforts and propose a new venue for researchers and practitioners in assistive and access technologies, to showcase their work and mingle together. By merging our bi-annual meetings into a single event, we endeavored to provide a single platform for exchanging ideas, stimulating conversation, and facilitating networking. The result is a success in terms of the number of answers to the Call for Contributions and the broader and richer thematic scope: we received a total of 37 proposals for Special Thematic Sessions (STS). A total of 285 abstracts were submitted from which 112 were accepted for publication in these proceedings. More than 25 proposals for workshops, tutorials, seminars, posters, policy sessions, and a product/demonstrator presentation framed a rich and interesting program for discussion and exchange.

The ICCHP-AAATE joint conference was hosted during July 11–15, 2022, by the Politecnico di Milano at its campus in Lecco, by the picturesque Lake Como. Following the tradition of the ICCHP and AAATE biannual meetings, it was an event open to everyone and anyone interested in new and original ways to put technology at the service of people living with a disability. ICCHP-AAATE 2022 hosted presentations, panels, and forums devoted to the creation of tools, systems, and services that are accessible by design and that can level the playing field for a world where everyone can enjoy equal opportunities. By bringing the AAATE and ICCHP communities together, this joint conference explored the common threads linking policy, practice, research, and advocacy for people living with disabilities, working together towards a more equitable, just, and participatory future.

Participants contributed to the conference in multiple ways. The scientific contributions, which underwent a rigorous peer review process, are now available in two different publications:

- these Springer Lecture Notes in Computer Science (LNCS) volumes, which focus more on the development, engineering, and computer science perspective of assistive technology and accessibility, and

- the open access compendium Assistive Technology, Accessibility and (e)Inclusion, which focuses more on the policy, education, implementation, and social services perspective of the field.

Both publications are structured into 22 Special Thematic Sessions. The review process involved 137 experts from around the globe. Three to five independent reviews of each submitted abstract were assessed by one of the program chairs to allow a fair final decision on acceptance during a two-day decision meeting and to provide professional advice for the submissions of the camera-ready versions of papers for publication.

This three step review process sought to guarantee the high-quality of the ICCHP-AAATE publications. Additionally, ICCHP-AAATE invited selected sessions on topics of high interest to publish new and extended work in their domain in a Special Issue of AAATE's Technology and Disability Journal.

Contributions to the Inclusion Forum, which provided a space for discussion, collaborations, and participation of multiple stakeholders, were reviewed by the Program Committee and presented in the conference in different programs including workshops, tutorials, seminars, poster sessions, and policy sessions with panel discussions. It also included a space where participants showcased projects, products, and services. Inclusion Forum contributions are published in the Book of Abstracts, which collects short descriptions and abstracts of all contributions to the conference. In addition, students presented their ongoing research in the Young Researchers' Consortium.

We would like to thank all the members of the Scientific Committee, the Young Researchers Committee, the Inclusion Forum Committee, the Organization Committee, the additional paper reviewers, and the student volunteers who dedicated precious time and effort to the organization of this event.

Moreover, we want to thank all of the participants at the conference for furthering the mission of AAATE and ICCHP, based on the belief that technology can contribute to breaking barriers, empowering people, and enhancing equity and inclusion for people with all abilities.

July 2022

# Contents – Part I

## Art Karshmer Lectures in Access to Mathematics, Science and Engineering

Art Karshmer Lectures in Access to Mathematics, Science and Engineering: Introduction to the Special Thematic Session .....	3
<i>Dominique Archambault, Katsuhito Yamaguchi, Georgios Kouroupetroglou, and Klaus Miesenberger</i>	
Conversion of Multi-lingual STEM Documents in E-Born PDF into Various Accessible E-Formats .....	7
<i>Masakazu Suzuki and Katsuhito Yamaguchi</i>	
An Efficient Method to Produce Accessible Contents for Online STEM Education .....	15
<i>Toshihiko Komada, Katsuhito Yamaguchi, and Masakazu Suzuki</i>	
Making Equations Accessible in Scientific Documents .....	22
<i>Shivansh Juyal, Sanjeev Sharma, Neha Jadhav, Volker Sorge, and M. Balakrishnan</i>	
Towards Semantically Enhanced Audio Rendering of Equations .....	30
<i>Akashdeep Bansal, Volker Sorge, M. Balakrishnan, and Aayush Aggarwal</i>	
Accessible Chemical Structural Formulas Through Interactive Document Labeling .....	38
<i>Merlin Knaeble, Zihan Chen, Thorsten Schwarz, Gabriel Sailer, Kailun Yang, Rainer Stiefelhagen, and Alexander Maedche</i>	
Designing an Inclusive and Accessible Mathematical Learning Environment Based on a Theorem Prover .....	47
<i>Bernhard Stöger, Klaus Miesenberger, Walther Neuper, Makarius Wenzel, and Thomas Neumayr</i>	
Developing a Corpus of Hierarchically Classified STEM Images for Accessibility Purposes .....	56
<i>Theodora Antonakopoulou, Paraskevi Riga, and Georgios Kouroupetroglou</i>	
Effective Non-visual Access to Diagrams via an Augmented Natural Language Interface .....	63
<i>Tomas Murillo-Morales and Klaus Miesenberger</i>	

<b>Interface for Automatic Tactile Display of Data Plots</b> .....	73
<i>Thorsten Schwarz, Giuseppe Melfi, Stefan Scheiffele, and Rainer Stiefelhagen</i>	
<b>Mobile e-Learning Platform for Audio-Tactile Graphics Presentation</b> .....	82
<i>Michał Maćkowski, Piotr Brzoza, Mateusz Kawulok, and Tomasz Knura</i>	
 <b>Digital Solutions for Inclusive Mobility: Solutions and Accessible Maps for Indoor and Outdoor Mobility</b>	
<b>Digital Solutions for Inclusive Mobility: Solutions and Accessible Maps for Indoor and Outdoor Mobility: Introduction to the Special Thematic Session</b> .....	95
<i>Claudia Loitsch, Karin Müller, Gerhard Weber, Helen Petrie, and Rainer Stiefelhagen</i>	
<b>Split it Up: Allocentric Descriptions of Indoor Maps for People with Visual Impairments</b> .....	102
<i>Julia Anken, Danilo Rosenthal, Karin Müller, Gerhard Jaworek, and Rainer Stiefelhagen</i>	
<b>Expert Study: Design and Use of Textures for Tactile Indoor Maps with Varying Elevation Levels</b> .....	110
<i>Christin Engel and Gerhard Weber</i>	
<b>ATIM: Automated Generation of Interactive, Audio-Tactile Indoor Maps by Means of a Digital Pen</b> .....	123
<i>Christin Engel and Gerhard Weber</i>	
<b>An Audio-Tactile System for Visually Impaired People to Explore Indoor Maps</b> .....	134
<i>Giuseppe Melfi, Jean Baumgarten, Karin Müller, and Rainer Stiefelhagen</i>	
<b>Supporting Independent Travelling for People with Visual Impairments in Buildings by Harmonizing Maps on Embossed Paper and Pin-Matrix Devices for Accessible Info-Points</b> .....	143
<i>Jan Schmalfuß-Schwarz, Christin Engel, and Gerhard Weber</i>	
<b>The Accessible Tactile Indoor Maps (ATIM) Symbol Set: A Common Symbol Set for Different Printing Methods</b> .....	153
<i>Giuseppe Melfi, Karin Müller, Gerhard Jaworek, and Rainer Stiefelhagen</i>	

Indoor Navigation Assistance for Visually Impaired People via Dynamic SLAM and Panoptic Segmentation with an RGB-D Sensor .....	160
<i>Wenyan Ou, Jiaming Zhang, Kunyu Peng, Kailun Yang, Gerhard Jaworek, Karin Müller, and Rainer Stiefelhagen</i>	
Accessible Adaptable Indoor Routing for People with Disabilities .....	169
<i>Fabian Lüders, Julian Striegl, Jan Schmalfuß-Schwarz, Claudia Loitsch, and Gerhard Weber</i>	
Monocular Localization Using Invariant Image Feature Matching to Assist Navigation .....	178
<i>Vikas Upadhyay and M. Balakrishnan</i>	
Can Route Previews Amplify Building Orientation for People with Visual Impairment? .....	187
<i>Vikas Upadhyay, Tigmanshu Bhatnagar, Catherine Holloway, P. V. M. Rao, and M. Balakrishnan</i>	
<b>Implementation and Innovation in the Area of Independent Mobility Through Digital Technologies</b>	
Implementation and Innovation in the Area of Independent Mobility Through Digital Technologies: Introduction to the Special Thematic Session .....	199
<i>David Banes</i>	
The Impact of Subjective Technology Adaptivity on the Willingness of Persons with Disabilities to Use Emerging Assistive Technologies: A European Perspective .....	207
<i>Alexandra König, Laura Alčiauskaitė, and Tally Hatzakis</i>	
Towards Personalized Accessible Routing for People with Mobility Impairments .....	215
<i>Alireza Darvishy, Hans-Peter Hutter, and Roland Mosimann</i>	
Traveling to Unknown Buildings: Accessibility Features for Indoor Maps .....	221
<i>Angela Constantinescu, Karin Müller, Claudia Loitsch, Sebastian Zappe, and Rainer Stiefelhagen</i>	
Acquiring Surrounding Visual Information Without Actively Taking Photos for People with Visual Impairment .....	229
<i>Masakazu Iwamura, Takaaki Kawai, Keigo Takashima, Kazunori Minatani, and Koichi Kise</i>	

Listening First: Egocentric Textual Descriptions of Indoor Spaces  
for People with Blindness ..... 241  
*Angela Constantinescu, Eva-Maria Neumann, Karin Müller,  
Gerhard Jaworek, and Rainer Stiefelhagen*

**Haptic and Digital Access to Art and Artefacts**

Non-visual Access to an Interactive 3D Map ..... 253  
*James M. Coughlan, Brandon Biggs, and Huiying Shen*

Development of Tabletop Models of Internal Organs for Anatomy  
Learning of the Visually Impaired ..... 261  
*Moeka Shinoda, Akihiro Koike, Sayaka Teraguchi, and Yoshinori Teshima*

Semi-automatic Contour “Gist” Creation for Museum Painting Tactile  
Exploration ..... 270  
*Son Duy Dao, Ngoc-Tan Truong, Edwige Pissaloux, Katerine Romeo,  
and Lilia Djoussouf*

Inclusive Multimodal Discovery of Cultural Heritage: Listen and Touch ..... 278  
*Katerine Romeo, Hannah Thompson, and Marion Chottin*

**Accessibility of Co-located Meetings**

Accessibility of Co-Located Meetings: Introduction to the Special  
Thematic Session ..... 289  
*Andreas Kunz, Reinhard Koutny, and Klaus Miesenberger*

Non-verbal Communication and Joint Attention Between People  
with and Without Visual Impairments: Deriving Guidelines for Inclusive  
Conversations in Virtual Realities ..... 295  
*Markus Wieland, Lauren Thevin, Albrecht Schmidt, and Tonja Machulla*

Emotion Recognition - A Tool to Improve Meeting Experience for Visually  
Impaired ..... 305  
*Mathieu Lutfallah, Benno Käch, Christian Hirt, and Andreas Kunz*

Pointing, Pairing and Grouping Gesture Recognition in Virtual Reality ..... 313  
*Valentina Gorobets, Cecily Merkle, and Andreas Kunz*

Accessible User Interface Concept for Business Meeting Tool Support  
Including Spatial and Non-verbal Information for Blind and Visually  
Impaired People ..... 321  
*Reinhard Koutny and Klaus Miesenberger*

## Interactions for Text Input and Alternative Pointing

- Study of User Behavior When Using a List of Predicted Words ..... 331  
*Mathieu Raynal and Georges Badr*
- TBS<sup>3</sup>: Two-Bar Single-Switch Scanning for Target Selection ..... 338  
*Mathieu Raynal and I. Scott MacKenzie*
- Impact of Using an Eye-Gaze Technology by a Young Adult with Severe Cerebral Palsy Without Speech ..... 347  
*Yu-Hsin Hsieh, Mats Granlund, Ai-Wen Hwang, and Helena Hemmingsson*
- Proposal of “micro:bit PC” Powered by Numeric Key Programming for both Visually Impaired and Sighted Elementary School Students ..... 355  
*Yoshihiko Kimuro, Taishi Takiuchi, Ken’ichi Furusato, and Takafumi Ienaga*
- Extended Mouth/Tongue Gesture Recognition Module for People with Severe Motor Dysfunction ..... 363  
*Ikushi Yoda, Kazuyuki Itoh, and Tsuyoshi Nakayama*
- Accessible Hands-Free Input Methods for VR Games ..... 371  
*Fiona Heilemann, Gottfried Zimmermann, and Patrick Münster*
- Gaze-Contingent Screen Magnification Control: A Preliminary Study ..... 380  
*Roberto Manduchi and Susana Chung*
- Pardon? An Overview of the Current State and Requirements of Voice User Interfaces for Blind and Visually Impaired Users ..... 388  
*Christina Oumard, Julian Kreimeier, and Timo Götzelmann*
- Learning a Head-Tracking Pointing Interface ..... 399  
*Muratcan Cicek and Roberto Manduchi*

## Cognitive Disabilities and Accessibility

- Cognitive Disabilities and Accessibility: Introduction to the Special Thematic Session ..... 409  
*Klaus Miesenberger, Susanne Dirks, Christian Bühler, and Peter Heumader*
- First Attempt to an Easy-to-Read Adaptation of Repetitions in Captions ..... 417  
*Mari Carmen Suárez-Figueroa, Isam Diab, Álvaro González, and Jessica Rivero-Espinosa*

<b>ACCESS+: Designing a Museum Application for People with Intellectual Disabilities</b> .....	425
<i>Leandro Soares Guedes, Valentina Ferrari, Marilina Mastrogiuseppe, Stefania Span, and Monica Landoni</i>	
<b>Investigating the Usability of Voice Assistant-Based CBT for Age-Related Depression</b> .....	432
<i>Julian Striegl, Marie Gotthardt, Claudia Loitsch, and Gerhard Weber</i>	
<b>Data-Driven User Profiling and Personalization in Tiimo: Towards Characterizing Time Management Behaviors of Neurodivergent Users of a Scheduling Application</b> .....	442
<i>Sofie Otto, Brian Bemman, Lykke Brogaard Bertel, Hendrik Knoche, and Helene Lassen Nørlem</i>	
<b>Voice Assistant-Based CBT for Depression in Students: Effects of Empathy-Driven Dialog Management</b> .....	451
<i>Marie Gotthardt, Julian Striegl, Claudia Loitsch, and Gerhard Weber</i>	
<b>Augmented Reality Game for Children with Autism Spectrum Disorder</b> .....	462
<i>Mario Covarrubias Rodriguez, Shefali Mehta, and Milton Carlos Elias-Espinosa</i>	
<b>Making Person-Centred Health Care Beneficial for People with Mild Cognitive Impairment (MCI) or Mild Dementia – Results of Interviews with Patients and Their Informal Caregivers</b> .....	468
<i>Henrike Gappa, Yehya Mohamad, Martin Breidenbach, Pedro Abizanda, Wolfgang Schmidt-Barzynski, Antje Steinhoff, Timothy Robbins, Harpal Randeva, Ioannis Kyrou, Oana Cramariuc, Cristiana Ciobanu, Theodoros N. Arvanitis, Sarah N. Lim Choi Keung, Gokce Banu Laleci Ertürkmen, Mert Gencturk, Mustafa Yüksel, Jaouhar Ayadi, Luca Gilardi, Angelo Consoli, Lionello Ferrazzini, and Carlos A. Velasco</i>	
<b>Augmentative and Alternative Communication (AAC): Emerging Trends, Opportunities and Innovations</b>	
<b>Augmentative and Alternative Communication Emerging Trends, Opportunities and Innovations: Introduction to the Special Thematic Session</b> .....	477
<i>E. A. Draffan and David Banes</i>	
<b>Open Licensed AAC in a Collaborative Ecosystem</b> .....	483
<i>E. A. Draffan and David Banes</i>	

Development of a Location and Situation Based Augmentative and Alternative Communication Service ..... 489  
*Seo-Yeong Ahn, Ki-Hyung Hong, Kyungyang Kim, and Heeyeon Lee*

Augmentative and Alternative Interaction Service with AI Speakers to Access Home IoT Devices and Internet Services for People with Multiple Disabilities ..... 496  
*Se-Hui Ryu, Ki-Hyung Hong, Soojung Chae, and Seok-Jeong Yeon*

**Language Accessibility for the Deaf and Hard-Of Hearing**

Language Accessibility for the Deaf and Hard-of-Hearing: Introduction to the Special Thematic Session ..... 505  
*Matjaž Debevc, Rosalee Wolfe, and Sarah Ebling*

Contemporary Assistive Technologies for Students with Hearing Loss in Higher Education ..... 512  
*Ines Kožuh, Peter Čakš, and Matjaž Debevc*

Comparing the Accuracy of ACE and WER Caption Metrics When Applied to Live Television Captioning ..... 522  
*Tian Wells, Dylan Christoffels, Christian Vogler, and Raja Kushalnagar*

Workload Evaluations for Closed Captioners ..... 529  
*Maria Karam, Christie Christelis, Evan Hibbard, Jenny Leung, Tatyana Kumarasamy, Margot Whitfield, and Deborah I. Fels*

Caption User Interface Accessibility in WebRTC ..... 536  
*Michelle Olson, Ianip Sit, Norman Williams, Christian Vogler, and Raja Kushalnagar*

See-Through Captions in a Museum Guided Tour: Exploring Museum Guided Tour for Deaf and Hard-of-Hearing People with Real-Time Captioning on Transparent Display ..... 542  
*Ippei Suzuki, Kenta Yamamoto, Akihisa Shitara, Ryosuke Hyakuta, Ryo Iijima, and Yoichi Ochiai*

**Author Index** ..... 553
